DIVYANSHI NAGAR

Data Engineer | AI Enthusiast

8766376575 | divyanshinagar12@gmail.com | Bengaluru, India | www.linkedin.com/in/divyanshi-nagar-3908a5271

PROFILE

Aspiring Data Engineer pursuing a Master's in Computer Applications at PES University, with hands-on experience in Python, SQL, ETL pipelines, PySpark, data validation, feature engineering, and predictive analytics. Built end-to-end ML applications and Power BI dashboards, including one in collaboration with the Deloitte US team. Skilled at turning raw data into reliable, decision-ready insights and communicating findings clearly to technical and non-technical audiences. Eager to build reliable, scalable data solutions.

SKILLS

Technical: Python, SQL, ETL Pipelines, Java, Next.js, Apache PySpark, PyFlink, Data Validation, Data Analysis, Data Preprocessing, Feature Engineering, AI & ML, Scikit-learn, Power BI, Streamlit, Oracle Cloud Database

Languages: English, Hindi

SOFT SKILLS

- **Group Discussion:** Contributes structured, evidence-backed points, listens actively, and helps the group reach consensus.
- **Presentation Skills:** Presents dashboards and ML findings in clear, story-driven formats for technical and non-technical audiences.
- **Analytical & Critical Thinking:** Breaks down complex problems, validates assumptions with data, and turns KPIs into actionable conclusions.
- **Communication & Teamwork:** Explains technical concepts in plain language; collaborated with Deloitte US, Deloitte Australia, and ParkMed teams.
-

WORK EXPERIENCE

Intern – Developer Bengaluru

Nerds and Geeks / Collaboration with ParkMed Oct 2024 – June 2025

- Tested a healthcare management application designed to track hospital operations, patient data, and administrative workflows, reporting defects and verifying fixes with developers.
- Utilized Oracle Cloud Database to write and execute SQL queries, perform data aggregation, and validate data integrity across modules — ensuring accurate and reliable system performance.

PROJECTS

Food Security Intelligence Dashboard – SDG 2 (Zero Hunger) 2025

AI/ML-Based State-Level Food Surplus & Deficit Prediction Python · Streamlit · Scikit-learn

- Built an end-to-end predictive analytics application using Python and Streamlit to classify each Indian state as food surplus, deficit, or balanced — supporting SDG 2 (Zero Hunger) objectives.
- Applied machine learning models on government agricultural and food distribution datasets, incorporating data cleaning, feature engineering, and preprocessing for high-accuracy predictions.
- Designed an interactive Streamlit dashboard enabling real-time state-wise exploration of food security indicators.

Professional BI Dashboard – Deloitte US Collaboration 2025

Business Intelligence & Predictive Reporting Power BI · SQL

- Built an interactive Power BI dashboard in collaboration with the Deloitte US team for business intelligence and predictive reporting across operational metrics.
- Integrated multiple data sources and designed dynamic visuals to surface actionable insights for stakeholders, and presented key trends and recommendations.

Note for Approval (NFA) System – College Initiative 2025

Workflow Automation · Top 6 Team

- Contributed to building a college-level digital NFA system to streamline institutional approval workflows and documentation — recognised as a top 6 team among all participating groups.

EDUCATION

Master of Computer Applications (MCA) — Bengaluru
PES University — 2025 – 2027
Currently pursuing

B.Sc. Data Science & Cyber Security — Bengaluru
Garden City University — Sept 2022 – 2025
CGPA: 8.85

Senior Secondary (12th) — New Delhi
St. Andrews Scots Sr. Sec. School
2006 – 2022

CERTIFICATIONS & ASSOCIATIONS

IBM – Data & Technology Certification | Oracle – Cloud Developer Certification | Google Cloud – Big Data and Machine Learning Fundamentals | Deloitte Australia – Professional Collaboration & Training | DeepLearning.AI – AI for Everyone | Google – Using Python to Interact with the Operating System
